

Help Me Grow Elevator Speech: **Service Providers**

Help Me Grow is a resource for parents and caregivers, for children birth through age eight, designed to connect families to information about child development and community resources. Any parent or community partner is welcome to dial 2-1-1 and ask for *Help Me Grow*. Their specially trained staff can answer questions about a child's development, behavior, health or learning. We help close the gap between the needs and available services for families by providing developmental screenings, referrals, and care coordination services.

We keep track of all available community resources on our online database and would like to include you and your program, so that we can make appropriate referrals for families who need your services.

If the families you work with need additional resources, you can make a referral to *Help Me Grow* by dialing 2-1-1 or completing a referral on our website at www.helpmegrowfl.org. We'll follow up with the family to make sure that they receive the proper information and are connected to needed supports.

Call 2-1-1 and ask for *Help Me Grow*
