

Help Me Grow[®]

NATIONAL NETWORK

UTAH

PLANNING & IMPLEMENTATION STATUS

Help Me Grow Utah was first implemented within one of the largest counties in Utah. As of November 2014 we went statewide. In January 2016, we expanded our services to include prenatal parents. Our program is universal, striving for the “no wrong door” approach to supporting families.

OUR HMG SYSTEM

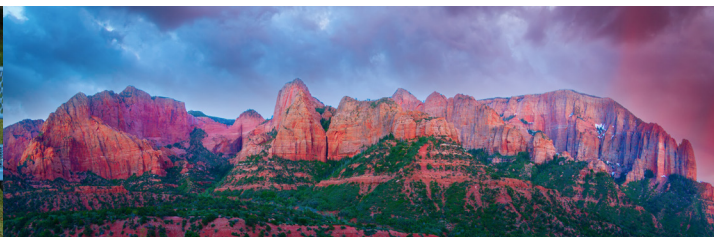

Staffing Our Call Center is where the majority of our staff are housed. We have outreach workers across state. There is also a core team working in our capital city, Salt Lake, due to more than half of the state’s population being there.

HELP ME GROW CORE COMPONENTS

- Child Health Provider Outreach** This outreach is overseen by one of our Child Development Specialists and implemented by Community Liaisons in their respective areas.
- Family and Community Outreach** We join more community events than we host, though we offer Books, Balls and Blocks activities and Learn and Grow events to encourage play and developmental screenings.
- Centralized Phone Access Point** Our call center is located in Provo. Most Care Coordinators are bilingual in English and Spanish. We are tied into the 2-1-1 resource database.
- Data Collection & Analysis** We have created a database to inform our workflow and data. From this an outside evaluator does annual evaluations for us. We also commission special evaluations through student projects or when the need arises.
