

HMG Mini Assessment 2022

The HMG Mini Assessment collects a specific subset of impact indicators typically captured within the full Fidelity Assessment. This subset of indicators is reported more frequently to allow for more readily available system-level data representing the impact of the HMG Model nationally. The HMG Mini Assessment is not designed to measure model implementation. All HMG systems, regardless of their classified implementation status from the previous year's Fidelity Assessment, complete the HMG Mini Assessment.

Date Mini Assessment Opens: Tuesday, March 1, 2022

Date Mini Assessment Closes: Thursday, March 31, 2022

In 2022, the HMG Mini Assessment will only be administered one time in the month of March. Starting in 2023, the HMG Mini Assessment will move to quarterly reporting in January, April, and July. Office hours are available for affiliates with questions about the Mini Assessment [here](#).

Please use the [UPDATED Data and Collection Reporting Guidelines for the HMG Mini Assessment](#) when filling out the survey.

For all questions related to information on the HMG Mini Assessment, please contact [Cassie Therriault](#).

1. Your name:

2. State:

3. County/district/catchment area (if used to define your system):

4. Please provide a best point of contact should we need to follow-up regarding your responses to this mini assessment:

Name

Email Address

Please report on the following HMG Impact Indicators based on the data for the last 6 months (September 1, 2021 to February 28, 2022):

5.

Served (S): Activities conducted by HMG CAP intended to support developmental promotion, early identification, referral and linkage, inclusive of basic need and family supports.

Responses in this section should be whole numbers. Please round to the nearest whole number when responding to the Mini Assessment.

FS: Total number of families served:
This number does not need to be unique (families that have returned more than once to HMG for assistance can be counted more than once).

CS: Total number of children served:

This number doesn't need to be unique (children that have returned to HMG more than once for assistance can be counted more than once).

SPN36: Total number of children served through the HMG Centralized Access Point needing prenatal services or have children aged 0 to 35 months and 30 days (up to their 3rd birthday) in support of developmental promotion, early identification, referral and linkage, inclusive of basic needs support. This is a subset of the number reported above in total children served (CS).

EO: Total number of families served that resulted in sharing information or education only:

R: Total number of families served that resulted in a referral:

RF: Total number of families served that received HMG follow-up:

6.

Total CAP Activities (TCA): Total CAP Activities encompasses every activity with or for a child and family in service of their stated goals and contribute towards the process of developmental promotion, early identification, referral and linkage and occurred in support of HMG care coordination inclusive of basic needs support. Activities inclusive of calls, text, web, in person and etc. should be captured in Total CAP Activities (TCA).

Responses in this section should be whole numbers. Please round to the nearest whole number when responding to the Mini Assessment. Please refer to the [Updated Data and Report Guidance for the HMG Mini Assessment](#) for a list of example activities that would be included in this metric.

Responses in the section below should be reported as a percent. The response should include whole numbers between 0-100. Please round to the nearest whole number when responding to the Mini Assessment. No percent sign is needed in the survey. If decimals or the % symbol are used, the survey will not let you submit.

7.

Needs Met (NM): The Impact Indicator Needs Met measures a family's experience with HMG CAP offerings, products, services.

How to calculate Needs Met:

Needs Met= # of families indicating their needs were met (NM) ÷ # of families served that responded to the needs met question (FS) x 100

8.

Linkage (L): The Impact Indicator Linkage is the proportion of families that report successful connection (SC) to a service or program provided through the HMG CAP.

How to calculate Linkage:

Linkage = # of successful connections (SC) ÷ # of Known Outcomes (KO) X 100

HMG Mini Assessment 2022

Thank you for participating in this year's Help Me Grow Mini Assessment!
